

Automated Filtration Systems

filtration control at your fingertips

DATA SHEET

To maintain optimum pool performance, the Topline Automated Filtration System allows you to control backwash and top up procedures automatically. This previously time consuming task can now be easily enabled via a touch screen display - or pre-programmed to perform at optimum times. The benefits include:

- Reduced water wastage
- Optimum filter operation
- Reduced labour costs
- Regular, efficient backwash and top up procedures
- No guesswork
- Managed plant room schedules
- Consistently clean, clear water
- Remote plant monitoring and control

Topline Automated Filtration Systems are individually designed and tailored to suit each facility, from a mono filter system to complex multi-pool multi banked, multi site filtration. Installed into a new pool or retro fitted into an existing one, it's suitable for all facilities.

Praher Automatic Valves

Topline Water Chemistry Systems are able to offer a range of quality, field proven, automated multiport valves. Manufactured in Austria, these valves are able to offer the following levels of automated control:

- Time only
- Pressure only
- Pressure and time

All valves are easy to install, are available in various materials and come in a range of pipework sizes from 1.5" to 3". The valves are suitable for use with the majority of well-known filter brands, and are available top or side mounting.
