

Training

the expert knowledge you need to operate your commercial pool safely

DATA SHEET

For your swimming pool and spa to operate within current guidelines it is vitally important that all staff are thoroughly versed in the current standards and practices legally required for operating a commercial wet facility.

Whilst recognising the importance of an industry approved course such as the one available from the ISRM, it was felt by some of our customers that it was not always practical to make available staff for courses not on site.

It was with this in mind that Topline developed a course that shares many of the aims of the ISRM, but is available at the convenience of the operator, at a time, location and cost that suits them.

Topline offer two courses, a one day course suitable for pool supervisors and a two day course suitable for pool plant operators.

The courses consist of a Power Point Presentation covering all fundamental areas of pool and spa operation.

After the presentation there are practical exercises and demonstrations all relating to the equipment used on site.

The course is completed by a multiple choice examination, which is marked and certificated on the day by the trainer.

Available to all attendees of Topline courses is a comprehensive folder detailing everything covered on the course. This folder will provide an invaluable guide to the operator and can be used to store the operators other reference material, such as Topline operating manuals which are available to download from our web site www.topline.uk.net.

Course Summary

On completion of either course the attendee will have increased their knowledge and understanding in the following areas:

- Pool Water Testing
- Pool Water Chemical Dosing
- Water Balance
- Pool Equipment
- Contamination Procedures
- Legionella Awareness
- Pool Filtration System

With the above knowledge the pool operator will be able to fulfil their responsibility to:

- Maintain safe pool water
- Keep the plant room safe clean and tidy
- Follow HSE guidelines
- Check facility is operated by competent personal
- Manage risk in the pool area
- Recognise areas for risk

By implemented a regular training programme. Well-trained knowledgeable staff can help boost your facilities' income by improving customer loyalty and attracting new visitors.

Topline believe this course provides trained, knowledgeable, informed staff who can deliver the "5" Cs of pool water quality:

Clean

Crystal Clear

Comfortable Conditions
